INTRODUCTION.

THE encreaſing Value of Lands in this Kingdom, demands the particular Attention of every Perſon, anywiſe concerned therein; from the Nobleman of the moſt extenſive Eſtate, down to the Holder of a few Acres. The Author therefore preſumes, that he will do a very important Service to all who may have Occaſion to purchaſe, ſell, lett, hold, or value Lands, as in the following Tables, they will find the Value or Rent of any Quantity, from One Acre to One Hundred; and ſo up to any Number: and of any Number of Roods and Perches, in each Acre reſpectively, from One Shilling to Five Pounds per Acre. The Author's extenſive Buſineſs in Land Surveying, and Valuation, gives him many Opportunities of ſeeing how eſſentially neceſſary ſuch a Work as the following would be to every Proprietor of Land, to Clergymen, Barriſters, Agents, Attorneys, Publick Notaries, Stewards, and alſo to the Farmer, who has frequent Occaſion to lett out ſmall Parcels of Land, to thoſe in a ſubordinate State. It is likewiſe an invariable Guide, to thoſe concerned in dividing common Fields, where the Value of one Part and the other, ſo materially differ; it will guard againſt the unavoidable Errors proceeding from haſty and inaccurate Calculations. In fine, it is a Standard to correct Errors, and detect Impoſitions; particular Care has been taken in the Accuracy of all the Calculations, and in arranging the whole in ſuch a familiar Manner, that Gentlemen will ſurely be pleaſed in being ſaved the Trouble of Calculations, and to others incapable of ſuch a Taſk, it muſt be very important and ſatisfactory. The Figures at the Top of the firſt and ſecond Columns in each Page, expreſs the Value or Rent of the Acre; the three Lines below of the Roods, and the following Lines, the Value of

the Perches, from One to Thirty-nine, in Proportion to the Rent per Acre mentioned at the Top of the Column; which are in Pounds, Shillings, Pence, and Farthings, and Decimal Parts of a Farthing; and expreſs the full and exact Value of each Article. There is yet a further Advantage in thoſe Tables, that as the *Iriſh* Plantation, and *Engliſh* Statute Acre, are both divided into the ſame Number of Roods and Perches, they ſerve equally to compute the Value of Land in both *Iriſh* and *Engliſh* Meaſure.

For the more eaſy underſtanding theſe Tables, the Author has annexed two Examples.

Ex. I Suppoſe it is deſired to know, how much Rent 43 A. 3 R. 27 P. will amount to, at 11s. 6d. per Acre.
